SUMMARY

AI Engineer with 6+ years of experience building backend systems, machine learning applications, and distributed cloud platforms. Experienced in Python, C++, FastAPI, AWS, and AI infrastructure, with a track record of designing scalable systems and leading engineering teams across fintech, AI, and blockchain products.

SKILLS

- **Expert:** Python, C++, C, FastAPI, Django, AWS, PostgreSQL, MySQL, Linux, Git, REST APIs
- **Professional:** TypeScript, Node.js, Docker, Kafka, Microservices, Distributed Systems, Graph Databases, RAG, Vector Databases, Deep Learning, LLMs, CI/CD, Blockchain

EXPERIENCE

C Graph Database Developer (contract) Overpower.ai Remote, USA 10/2025 - 01/2026

- Built a high-performance **graph database engine** in C with a Cypher-style query parser and columnar property storage.
- Implemented ACID transactions, WAL persistence, and crash recovery for durable and persistent graph workloads.
- Designed bitmap indexes and a query planner to accelerate graph queries, with vector support for AI embeddings.

Backend Engineer (contract) Neptune Technologies LLC Remote, USA 03/2024 - 10/2024

- Built **FastAPI** backend services for fintech CRM workflows, improving scalability and maintainability.
- Integrated Stripe subscriptions API into the CRM, enabling seamless automated billing and payment processing.
- Collaborated with cross-functional teams to streamline feature integration, reducing deployment time by 30%.

Full-stack Developer (contract) N01ZET Remote, France 04/2022 - 05/2024

- Led a 5-engineer team, improving app performance by 60% with ReactJS, TypeScript, and Node.js.
- Created and deployed EOSIO blockchain smart contracts, enabling secure transactions for 10+ organizations.
- Implemented Kafka-based **microservices**, scaling to thousands of users and reducing response time by 30%.

Full-stack Engineer Handy Services Yaounde, Cameroon 05/2021 - 02/2024

- Led development and deployment of web apps and services using Django, Django REST Framework, and Vue.js
- Built scalable payment APIs integrating Mobile Money providers and coordinated backend engineering efforts.

Machine Learning Engineer (contract) Mboa Digital Yaounde, Cameroon 11/2020 - 06/2021

- Developed **machine learning pipelines** for automating bank statement and invoice reconciliation, with 90% accuracy.
- Built AWS Lambda-based inference pipelines using API Gateway and cloud services, enabling scalable deployment.

Freelance Software Developer [Upwork](#) - [Fiverr](#) Remote 04/2018 - 05/2020

- Worked with clients across six continents in industries like transport and entertainment. Consistently delivered exceptional service, achieving **100% client satisfaction** and securing repeat business, reflected in **30+ five-star reviews**.

PROJECTS

Graph Database Engine

- **High-performance** graph database in C with ACID transactions, WAL persistence, bitmap indexes, and vector search.
- Continuously evolving as an experimental platform for AI long-term memory research and production applications.

LLM-Aware Graph Memory Architecture (MSc Dissertation)

- Researching **graph-based long-term memory** architectures for LLM agents using semantic retrieval and graph traversal.
- Evaluating retrieval quality, scalability, and persistent knowledge storage

EDUCATION

Masters of Science in Artificial Intelligence	De Montfort University	09/2025 - 09/2026
Bachelor of Science in Computer Science	University of Buea	10/2015 - 03/2019
